Allowable Subject Matter

1. Claims 1-4, 6-17 are allowed.

Independent claims 1 and 12 recite and an image coding method and apparatus including "...performing a first search by matching between the current image and the reference image to perform a first search; and determining whether a motion vector is detected" in the first search; and performing, if only when no motion vector is detected in the first search, substantially the same frequency wavelet transform to both of the current image and the reference image~ and then matching between size-reduced images generated by the frequency wavelet transform to each other to perform a second search..." which are features that are not anticipated nor obvious over the art of record. Dependent claims 2-4, 6-11, and 13-17 are allowed for the reasons concerning the independent claims.
